### **A day at school**

School life is the golden period of man's life. It is the period of learning manners and making good habits. I am a student of a very reputed school Guru Tegh Bahadur third Centenary Public school. A day at my school is like a lot of work and enjoyment. My school starts at 7:30 and the bell rings. After the bell we stand up for the prayer and prayer ends with the national anthem. After the prayer we start with our studies with the first period. The duration of every period is half an hour. Our teachers teach us with great love and care . Every teacher of our school is very hard-working.

Around 10:30 the recess starts, we have our lunch, eat, play, talk to our friends and run towards the canteen for refreshments. This is the favourite time of my school. Four periods follow after the recess. We are again taught by our teachers with a lot of activities . At 2 o'clock the bell rings and we go back to our homes to start another beautiful day.

I love my school and will cherish every moment spent here all of my life.
