

Assignment:-3 Subject: - Science Class:-IV Teacher:-Mrs. Neena Gupta

Name:-_____ Class & Sec.:-_____ Roll No.:-_____ Date:-

Lesson:-8 (Our Surroundings)

Answer the following questions:-

Q:-1) Write three things which you should do to keep your house and surroundings clean.

- Ans:-** 1) Do not dump the garbage on the road.
 2) Do not throw empty chips packets, plastic bags, ice cream cups on the roads.
 3) Grow more trees in your surroundings.

Q.2) What are the three R's?

Ans. :- The three R's stand for

- 1) Reduce – means to use less
- 2) Reuse- means to use things again
- 3) Recycle:- means to recycle waste materials.

Q.3) What are the advantages of recycling paper?

Ans:- paper can be recycled by the process of papier-mache. This recycled paper can be used to make greeting cards and covers of books.

Q.4) Write the differences between:-

a) Water Pollution and Soil Pollution

Water Pollution	Soil Pollution
Degradation of water quality due to release of waste water bodies is known as water pollution.	Soil pollution is caused due to mixing of harmful substances in soil

b) Reduce and Reuse

Reduce	Reuse
It means to use less.	It means to use things again.

c) Bio Degradable Waste Material and Non-Bio Degradable Waste Material

Bio Degradable Waste Material	Non-Biodegradable Waste Material
Bio Degradable Waste is that which decomposes and gets absorbed in the soil.	Non-Bio Degradable Waste does not decompose.
