

Class-3

Subject-EVS

Date-14/10/2020

Teacher-Mrs Surmeet Kaur

Assignment no- 3

**Topic- Lesson 18- Plants our friends
(Leaves the food factory)**

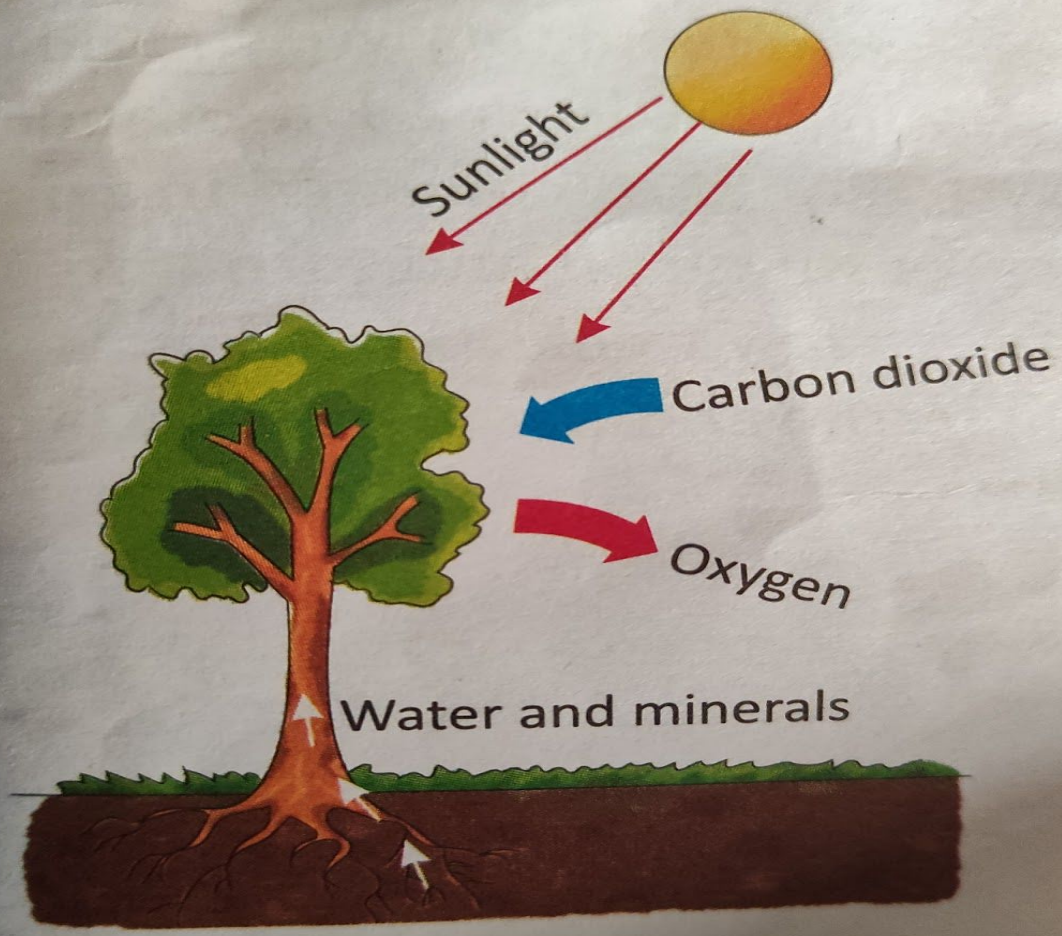

Photosynthesis - A process through which plants make their own food. For photosynthesis plants need

1. Water and mineral from soil
2. Energy (light) of the sun
3. Carbondioxide from the air and
4. Green leaves

Note- Carefully watch the following video and complete the work in your EVS notebook.
