

Assignment: - 2 Class:- IV

Teacher Name:- Mrs. Neena Gupta

Subject: -Science

Date:- /12/2021

Lesson 4. Reproduction in Animals

Define the following: -

7) Metamorphosis - It is a change in the form of an organism by a natural process of growth and development

8) Embryo - A growing baby inside the egg

9) Incubation - The bird sits on the egg to keep it warm so that the young one develops inside the egg.

10) Hatching- Breaking of hard shell and baby bird coming out of it.

11) Cocoon - Covering made from thread which some insects make around themselves to protect and grow.

12) Mammals - Animals that give birth to young ones, have hair on their bodies and feed their young ones on their milk.

13) Marsupials:- Animals have a pouch attached to their bodies for carrying their babies.
