Assignment 8 Date: 16/11/21 Subject: Mathematics
Class :2 Teacher: Kalpana Bawa
Lesson:4 TIME

## POINTS TO REMEMBER :

We use a clock to tell the time.
A clock has two hands. Long hand is minutes hand and short hand is called hour hand.

Clock has a surface, it is called face/ dial. It is divided into 12 equal parts.

Each part shows an hour, each hour is further divided into 5 equal parts called minutes.

So 1 hour $=60$ minutes $(12 \times 5=60)$
The minute hand (long hand) moves from one number to the next number in 5 minutes.

The hour hand (small hand) moves from one number to the next number in an hour.

## TELLING THE TIME

Time in hours

- When long hand (minute hand) is at 12 , and small hand( hour hand ) is at any number on the clock. The time is a full hour.
- Eg if long hand is at 12 and small hand at 5 then time is 5:00 or 50'clock
- Q1

Write the correct time underneath each clock. The first one has been done for you.

Time in half past hour:
E.g If small hand is between 7and 8 and long hand is at 6 . Then time is half past 7 .

Q2 :

Write the correct time underneath each clock. The first one has been done for you.

## TIME IN QUARTER PAST:

Eg: In a clock if long hand is at 3 and small hand is at 9 , then we will say the time is quarter past 9.

Q3:

Write the correct time underneath each clock. The first one has been done for you.

## Q4: TIME IN QUARTER TO

Eg.: If in a clock long hand is at 9 and small hand is at 2 , then we will say the time is quarter to 2 .

Q4

Write the correct time underneath each clock. The first one has been done for you.
Quarter to 4
