Paragraph writing

Save Earth

Pollution has been the root cause of the destruction of our planet Earth . From seas to land, and even mountains; every place has been covered with debris and litter. Our Earth is choking, and we must act to prevent it from becoming a dead planet.

The most basic thing by which we can save our planet is by controlling our polluting activities . We must adopt the three steps of 'Reduce, Reuse, and Recycle' to control the amount of waste. We can recycle plastic , stop wastage of water and plant more and more trees to save our planet.
