The Roman Symbols

Roman Symbols are based as the following symbols

Hindu-Arabic numeral	1	5	10	50	100	500	1000
Roman numeral	I	V	X	L	C	D	M

Forming Numbers - The Rules.

When a symbol appears after a larger (Or equal) symbol. it is added.

example - VI = V + I = 5 + 1 = 6

$$LXX = L + X + X = 50 + 10 + 10 = 70$$

but if the symbol appears before a larger symbol, it is subtracted

Example- IV = V - 1 = 5 - 1 = 4

$$IX = X - I = 10 - 1 = 9$$

Do not use the same symbol more than three times in a row .
